

ESRAA MOHAMED SAMIR

Network & Cyber Security Technology Student

(+20) 120-271-7430 | esraa240103458@sut.edu.eg | linkedin.com/in/esraa-mohammed-750a6532b

PROFESSIONAL SUMMARY

Second -year Network & Cyber Security Technology student at El Sewedy University of Technology with hands-on experience in digital forensics, network security, IoT security, and Linux systems. Completed Vodafone Egypt Industrial Partner Program internship. Developed AURVEX, a cloud-based gold retail management system integrating real-time data and financial reporting. Pursuing CCNA certification. Seeking an internship in banking technology, fintech, or cybersecurity.

EDUCATION

El Sewedy University of Technology (SUTech) B.Sc. Network and Cybersecurity Technology GPA: 2.9/4.0 (Current Semester) CGPA: 2.8/4.0 (Overall)	Sept 2024 – Present Cairo, Egypt
Distinguished Official Government Language School High School Diploma (Thanawayya Amma)	July 2024

PROFESSIONAL TRAINING & CERTIFICATIONS

Vodafone Egypt – Industrial Partner Program Internship covering telecommunications, digital innovation, enterprise systems, and network architecture.	2024 – 2025
CCNA Certification Cisco Certified Network Associate – Issued by Cisco & Egyptian Ministry of Foreign Affairs. Covers networking fundamentals, routing, switching, security, and enterprise systems.	In Progress Exam: June 2025
Certificate of Appreciation – "CTRL YOUR FUTURE" Egyptian Ministry of Youth and Sports – Technology, Programming, AI & Cybersecurity.	2025

ACADEMIC PROJECTS

AURVEX – Digital Gold Web Management System Sept 2025 – Jun 2026 - Cloud-based platform to digitize gold shop operations: inventory, transactions, and financial reporting - Integrated real-time market data, AI-driven analytics, and QR scanning for smart hardware solutions
IoTSecLab – Securing Smart Devices in Campus Networks - Identified and mitigated IoT security vulnerabilities in a simulated campus network environment - Tools: Wireshark, Cisco Packet Tracer, network traffic analysis
Cloud Forensics – Investigating Incidents in AWS & Azure - Conducted digital forensic investigations on simulated cloud security incidents - Analyzed logs, identified breaches, and documented forensic findings
Password Auditing & Security Assessment Tool Built a Python/Bash tool to audit password strength and educate users on secure practices
Hospital Management System – OOP Project (Java) Developed using Java Swing with a 3-layer architecture (GUI / Service / Model), applying OOP principles
Advanced University Network Topology Design Designed and simulated an enterprise-grade network using Cisco Packet Tracer and GNS3

TECHNICAL SKILLS

Programming	Python, Java, C, SQL, Bash Scripting
Networking	Cisco Packet Tracer, GNS3, Wireshark, Network Operations & Management
Cybersecurity	Digital Forensics, Cloud Forensics, IoT Security, Network Security, Password Auditing
Databases	MySQL
Systems	Linux, Windows
Tools	Docker, ELK Stack (Elasticsearch, Logstash, Kibana), VS Code

Languages

Arabic (Native) | English (Professional Working Proficiency) | French (Intermediate)
